

GRADUATE MODULES

Graduate Modules are advanced courses available exclusively to alumni which provide specific areas of focus that further build upon the framework of study from the schools. Modules can be purchased a la carte at any time through our offices for self-paced study. They are also available periodically as 6-8 week, facilitator-led master courses administered online with meetings via conference call/webinar. These facilitated modules qualify for transferable units of study toward theology degrees through our partnership with CLST Global.
